

**INTERVIEW SUMMARY**

The undersigned, Steve Stewart, thanks Examiner Raman for the courtesies extended in the September 30, 2008 in-person interview.

The Examiner suggested changing the term “apparatus” to --handheld cell phone-- to provide even more support from the 6,947,571 patent.

The term “in-band” was also discussed. The undersigned indicated that, according to the definitions in the specification (e.g., page 1, lines 21-23), the term “in-band” referred to conveying data with watermarking for claim 21. This is also referred to data hiding.

The term “mask” was also discussed. In this regard, we have added the terms “or hide” for even further additional clarification.

We again thank the Examiner for her time and professionalism during the interview.
